About This Game

World War I is a real-time strategy based on the modified version of the well-known Blitzkrieg engine.

Humanity did not know any military conflicts similar to this one: the interests of dozens of countries got involved. For the first time, tanks, aviation, dreadnaughts and chemical weapons were used in battle. Warfare has become really massive. World War I lasted 4 long years and as a result, 3 Empires disappeared from the world map. The game World War I covers these historical events of 1914-1918 in over 30 missions grouped into 3 campaigns and one additional chapter. As a commander leading the forces of Germany, Russia or Allies, the player must be prepared to prove their military leadership skills on the battlefields of Europe.

A wide range of tactical elements is at your disposal: organize the baseline, set priorities in targets and set up advanced defense lines. Light cavalry will give you speed and maneuverability in offense, artillery provides additional defense and fire support and armored vehicles help with suppressing fire against enemies.

Features:

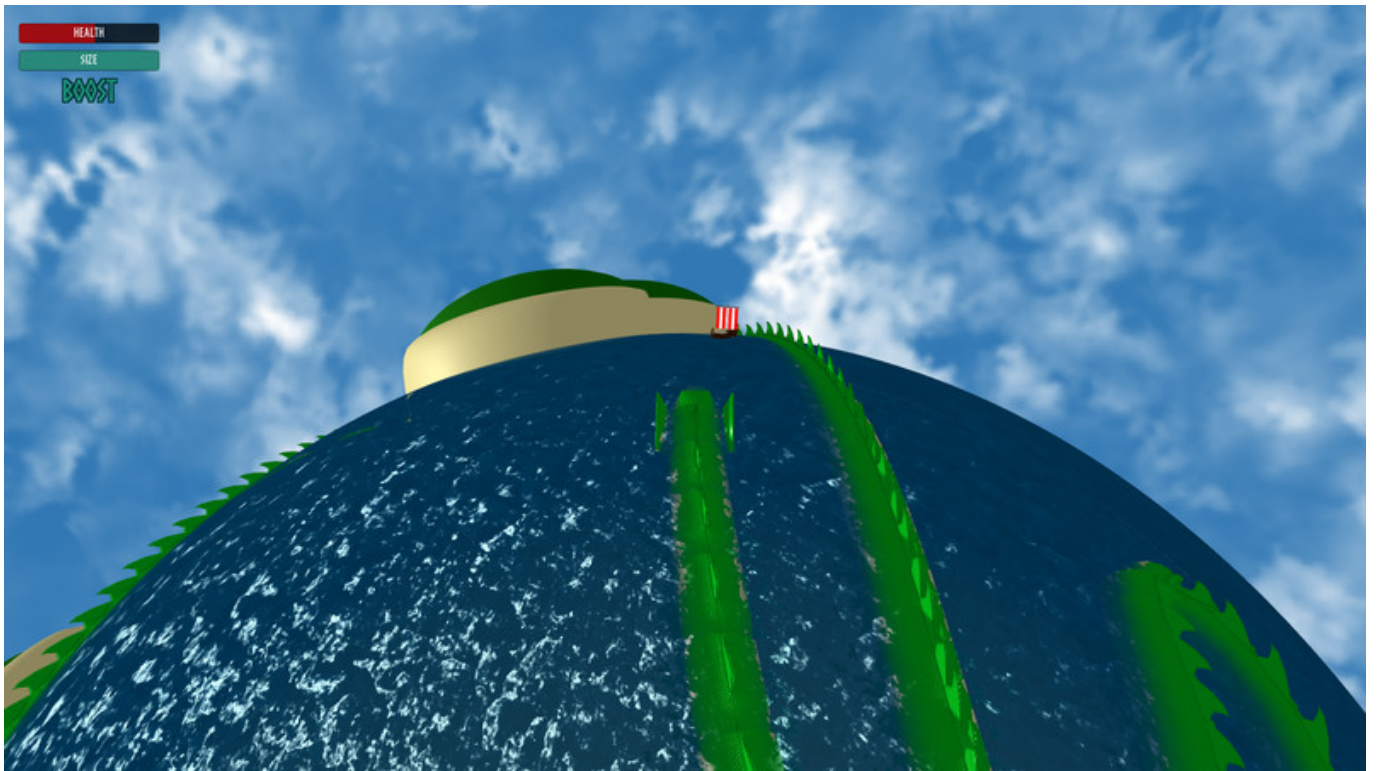

- RTS based on real events of 1914-1918
- Running on the modified version of famous Enigma Engine (Blitzkrieg series)
- Three campaigns: Entente, Russia and Germany

-
- Dozens of units at your disposal, including cavalry, armored vehicles and air support

Title: World War I
Genre: Strategy
Developer:
Dark Fox
Publisher:
1C Entertainment

good fap material. The YDNJ trivia series is great. I love them.. Good graphics and gameplay would recommend. This game is great! It was stuck there in my library for maybe a couple years, and it never picked my interest at all. Then today I thought "hey, let's see what the hell is this Air Forte", and turns out it is a hilarious little game by Blendo Games :D It is a simple educational-airplane-game with a funny story going on, and filled with these guys quirky humor. The epilogue is priceless! Plus, I learned where Honduras is, and greased my math cogs. Recommended!. It's okay.

As someone said, it's been pretty much the same since 2013 (worse than FM).

But hey, it is the only cricket sim out there, so I am giving it positive.

. Really interesting concept and gameplay, it's like a chess game 2.0. The addon "eye of Horus" is good but at least, the game only is the best from my point of view. It's that kind of game which is simple to use but hard to have a great strategy after that. Really good !. Iv been playing this game since it was advertised on /r/dwarffortress and that has been about a year, this game has been growing like a weed and I love it. The RNG keeps it fresh and its very diffacult at times (unless you use the arena) but ultimately it has potential and a creator who wishes to fill that potential and quick seeing how one person is doing all this.

holy sheet! BAD\u2665\u2665\u2665\u2665GAME.... mOTION SICK LIKE CRAZY.. barffffff. NEED TO FIX THAT SOMEHOW. Well, I thought I had found a simple and quirky game that would satisfy my mech war needs. However, that was not to be so. The "game" is not really so much of a game, but more of a "proof of concept". You have one mech, which you can upgrade with a few options of chassis, cabin, weapons, legs, and colors. All of which take some money. So far so good.

However, there is only a single map, the opponents are pretty simple AI pilots that either fire at the closest enemy, or if close enough, at your base center. That's it. Rinse, repeat. There is about 2 hours of game here, as you earn enough money to buy the biggest guns and fastest legs, and then proceed to crush mechs by the truckload, and wait out the inevitable defeat at ever stronger waves of opponents. But it is fun to watch them explode over and over again. Until you are done with it.

The game would have been nice and simple if there had been several more maps, more intelligent opponents, and even the ability to defeat the enemy base by blowing up their base center. Alas, that is not present.

I would suggest buying this game when it is deeply discounted, and there have been updates and additions to it.

. Had to return it, the frame rate even on the "fastest" setting is terrible during explosions, which is pretty much the purpose of the game. My PC handles FAR more intense games with ease- Witcher 3, Just Cause 3, DOOM to name a few, maxed out. No go for me, even at the 2.00 sale price.. pretty nice weapons pack for the price, Mauser is really awesome. AVS 36 is decent but needs to be upgraded ASAP and the Drilling is surprisingly versatile. Great game!. Overall: I'm quite torn, but since I REALLY wanted to return to the feelings I had with Everlasting Summer, REALLY wanted it to last longer (maybe get stuck in the time loop to make it REALLY everlasting??), and REALLY wanted to choose Alisa again (you get how much I loved Everlasting Summer, yeah?), I think overall this offshoot is faithful enough to ignite a little spark for diehard fans.

- + The art and music is nice and faithful to Everlasting Summer
- + For the most part (occasional out of character moments), the characters are also well drawn out and reminiscent of Everlasting Summer
- + The plot is simple but sweet
- + It's free

- The English translation is bad, sometimes hilariously bad ("she gave me the feels..."- omg XD). But you get the gist.
- The whole story doesn't work as a stand alone- only those who REALLY loved Everlasting Summer and REALLY wanted to return to the pioneer camp will get a kick out of this.

So, yeah, it's alright, but unless you REALLY loved Everlasting Summer and REALLY wanted to spend time with the characters again, it's probably a miss.. BIG UPS not perfect. but having fun.better info on how not to die aside..... 30 minutes of game play.

- Set up
- Random zombie's spawns
- Go to gastation
 - a. leave a person get clothing

- Police Station
 - a. leave a person get gear.

Spawned dozen of random gear and clothing
More zombie random spawns in game.

Get bored. Think about the money I wasted.

END GAME.

. Game is cool, having a hard time progressing, every time I spawn there seems to be a cluster of 3 drones waiting for me. I have found ships spawning in other ships, kinda annoying. The gun is hard to shoot, or I might just suck with it. I love the movement, it is awesome. Your ship is cool, would like to be able to make it bigger, maybe even into a space station. Even if it is just prebuilt snap ons such as "living quarters" "kitchen" "airlock." Besides expansion, I would like to see a greater goal than "protect your ship from lame astroroids" This game has great potential if it included multiplayer I could see it being one of the most

played vr titles out. I recommend this game if you are wanting to support the dev team to make to better.. Quality game similar to risk. Instructions very clear cut and simple to understand. If you are looking for a complex grand strategy then turn your head, but if you want some quick, fun arcade strategy then here you go
